A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 3, 2003 has been entered.

Claims 22 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 22, line 7, "said guide wire for directing said catheter to said lesion" has no verb associated with it and is thus not understood. This may be corrected by changing "for" to "being capable of" or similar language. In claim 23, line 5, "being in contact with said vasculature" is confusing and inaccurate since core wire 34 is surrounded by shaft 38 and therefore does not contact the vasculature.

Claims 22 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Reger et al. (5,160,342). Reger et al. disclose vascular filter guide wire 36 insertable and steerable through the vasculature (col. 6, lines 3-19 and col. 8, lines 36-51) and

catheter 16 having a lesion treatment device 14, the guide wire including a collapsible filter 10 for manual deployment (col. 8, lines 52-65) downstream of the catheter. As to claim 23, Reger et al., in figures 13 and 14, disclose a vascular filter guide wire 110, 112 including core wire 124, tubular flexible shaft 114 and collapsible filter 110 coupled at one end to said shaft (by members 118) and at its other end to the core wire 124 (at the right end of figures 13 and 14).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's arguments with respect to claims 22 and 23 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (703) 308-2981. The examiner can normally be reached Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J. Milano can be reached on (703)308-2496. The fax phone numbers for the organization where this application or proceeding is assigned are
